DOUBLE REBATE COMPOSITE DOORS

DUO

Are you ready to adore your door?

The Duo is designed with meticulous attention to every detail and finished to the highest possible standard.

Your front door is a symbol of your home, your family and your life. It's as individual as you are. It says a lot about you. Which is why it's so important that when you choose a new door, it has to be exactly right. Not just nearly right. After all, it's going to be with you for years to come. So it's something you're going to want to cherish. To adore.

It's going to keep you, your family and possessions safe and sound. It's going to keep out the cold and wet, yet keep in the warmth. It's going to be as good looking in 10 years time as it is on the day it's installed.

So take your time in making the right decision and make certain it's one that you don't regret. Choose a Duo Composite Door and get ready to adore your door from the moment it arrives.

DUO

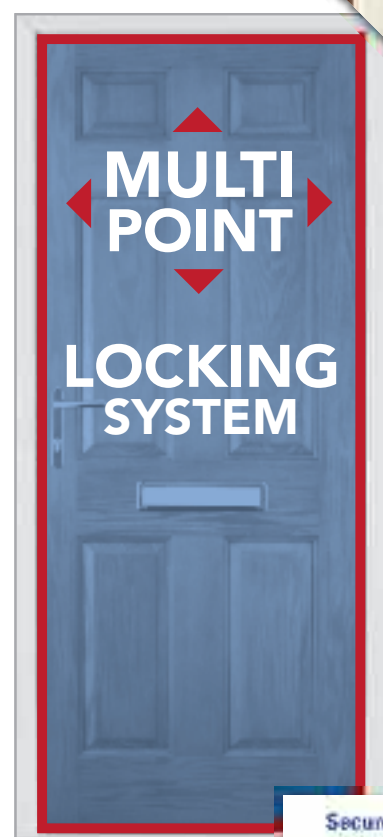

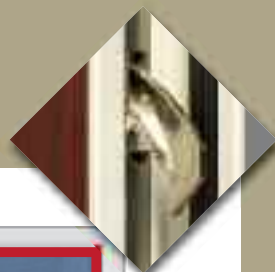

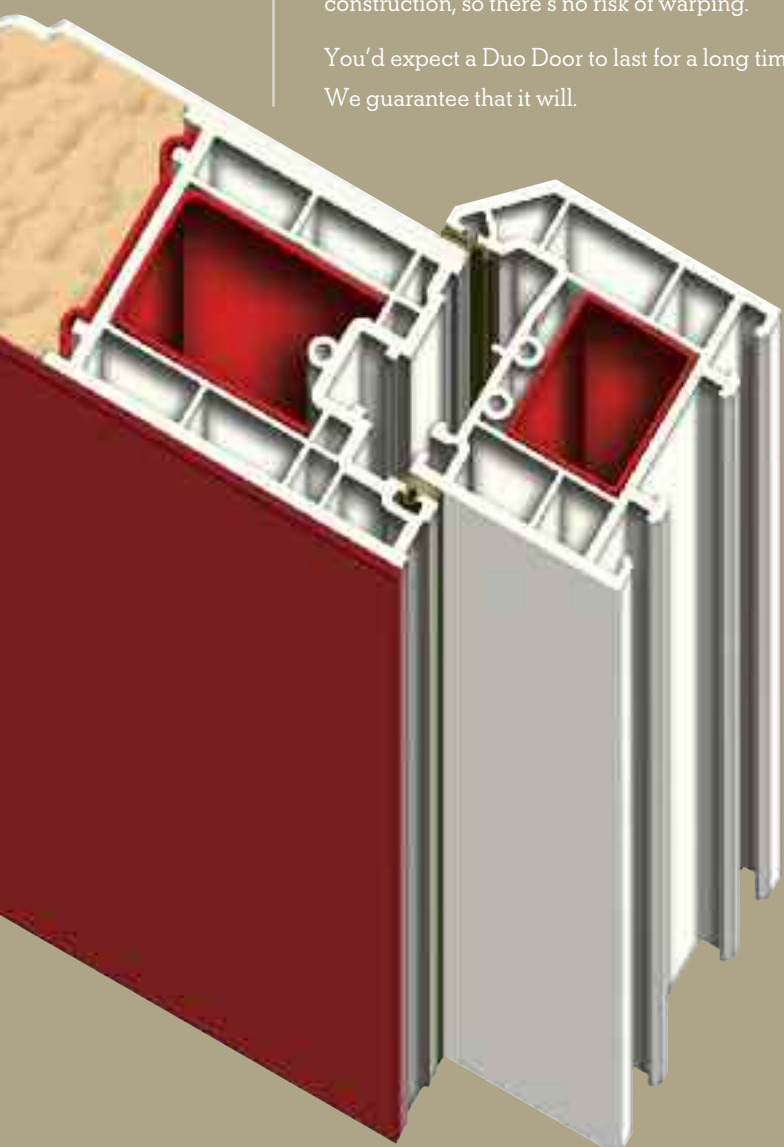

Secure

Every Duo door is fitted with an ultra-secure multipoint locking system.

All Duo doors are 68mm thick. Their ultra-strong GRP skins, combined with an extra-strong multipoint locking system provide the highest level of security and deliver total peace of mind. The doors are 50% thicker than most competitors. From start to finish Duo Doors are designed, developed, manufactured and installed to meet or exceed all current British standards.

The doors achieve PAS23 and PAS24, the latest and most stringent BSI security and weather performance standards. They are Secured by Design - the official police security initiative. They're thicker than nearly every other door on the market and there's no timber involved in their construction, so there's no risk of warping.

You'd expect a Duo Door to last for a long time. We guarantee that it will.

Capable

Every Duo Door is double rebated as standard.

By fitting a double rebate to every door, we're helping you to stay warm. And helping the environment. It makes the weather seals much more draught proof and effective than their single rebate equivalents. So you get to keep more expensive heat on the inside, whilst keeping more cold weather on the outside.

What's more, the high density central core of each door provides excellent acoustic and insulation qualities, helping to keep even more of the heat in than standard infill doors and achieving the highest ratings of any door on the market.

All of which adds up to lower energy bills. Something that we all want.

Elegant

With its wide range of colours, styles, glazing and finish options, you'll probably never see another Duo door the same as yours.

Duo doors are created with symmetry and proportion in mind, finished with attention to detail, built using the strongest, low-maintenance materials available, and will enhance the appearance and character of any home, whether contemporary or modern.

The combination of colour, glass, furniture and finish means that there are over one and a half million options from which you can choose your perfect door. One that's not only elegant but also individual. Stunning.

You can complement your door with side panels or, for the wider entrance, sidelights and toplights.

A Duo door looks as perfect in a leafy rural parish as it does in a busy city street.

Confident

With a thick skin of ultra-hard wearing Glass Reinforced Plastic, your Duo door will perform just as you'd expect. Or better.

All Duo doors are manufactured to the highest standards in our factory in the UK, using only the highest-grade materials. Their performance is fully guaranteed for 10 years but designed to last for over a quarter of a century.

The high quality sub-frame is individually constructed to match every door size exactly, and combines strength and stability with sturdy joints locking everything tightly in place.

What's more, they're produced in an environmentally responsible manner using renewable resources and low energy processes, with factory waste kept to a minimum and recycling employed where possible. Every Duo door is a "green" door.

It is not every day that you invest in a new front door. So it's vital that you choose a door that you can trust. One that gives you and your family peace of mind. One that will stay looking good for years to come. Duo. The only door you'll ever need.

Quick Reference Style Guide

Colours

Our GRP 'through colour' doors are available in a choice of 8 colour finishes including black (beck brown) and white.

Door furniture

Add the finishing touches to your door by choosing from a complete range of matching quality door handles, letterplates, urn knockers, spyholes, security chain and numerals in gold and chrome effect finish.

High Security Performance Hardware Doors are fitted with high security, multi point door locks and adjustable flag hinges as standard. Both conform to the Secured by Design official police security initiative, and meet the latest Security (PAS24) and weather performance (PAS23) standards.

Low Threshold Optional aluminium low thresholds are available at 15mm (Part M Compliant) for easier wheelchair/pram access or 30mm heights.

Performance We meet the requirements of the most stringent and recognised consumer British security and safety standards. Doors pass the PAS24 security standard, which measures resistance against forced mechanical and human entry. Doors pass the latest PAS23 standard, a measurement of resistance to air and water penetration, at the highest level.

The Secured By Design standard is recognised by the Association of British Insurers.

UV Stable Tested Doors are tested to withstand extreme sunlight conditions and are UV stability guaranteed to 10 years.

Environmental Considerations Our products are environmentally friendly. We use CFC free polyurethane foam for the inner core and a timber free construction throughout. Manufactured under ISO 14001 Environmental Management System licence.

All extruded components are sourced in the UK

Every Duo Door style can be upgraded to Duo Guard specification.

DUO GUARD As well as sharing many of the qualities of the class-leading Duo range, the Duo Guard specification adds a unique double rebate system combined with 12 locking points to provide unrivalled protection against flooding and break in – in fact it reduces water ingress by 99.5% when compared to a standard single rebate door.

A separate Duo Guard brochure is also available: ask for a copy

Colour Accuracy Every effort has been made to match the colours shown as close as possible to your chosen product. Images of colour swatches will vary slightly to the finished product. The brochure is designed to give a better idea of the colour options available. We advise that you ask your installer for a swatch sample.
